

AMENDMENTS TO THE CLAIMS

The following listing of claims replaces all prior listings of claims in this application.

1. – 11. (Canceled)

12. (Currently Amended) A method for identifying a location, comprising:

storing identification information associated with a delivery location, the identification information including a street address and a telephone number for the delivery location;

providing a view of surroundings to a user device worn by the user in response to a position and orientation of the user, the view provided to the user device being the same user view as if the user were not wearing the user device;

determining a location in the view by determining the location in the view to be within a specified distance from the user and within an orientation of the view vis-a-vis the user orientation;

receiving target data from the user device corresponding to the location in the view, the target data being an image of a target in the view of the surroundings;

identifying the location in the view in response to the target data; and

displaying identification information relating to the target data corresponding to the location on the view of the user surroundings to the user, the identification information including street address and telephone number for the delivery location to confirm that the image of the target is the delivery location.

13. (Previously Presented) The method of Claim 12, wherein displaying the identification information comprises displaying the identification information in association with the location on the view of the user surroundings.

14. – 16. (Canceled)

17. (Previously Presented) The method of Claim 12, wherein identifying the location in the view includes using the position and the orientation of the user to identify the location.

18. (Canceled)

19. (Currently Amended) The method of Claim ~~18~~12, wherein the viewing apparatus transmits the position and orientation of the user to a position/location service to generate the view of the surroundings.

20. (Currently Amended) The method of Claim ~~18~~12, wherein the viewing apparatus is worn in front of the user's eyes.

21. (Previously Presented) The method of Claim 20, wherein the target data is selected by tracking user gaze at the viewing apparatus.
